According to **David Pells**, managing director of the PM World Library, "We discovered these books in the EBSCO Business Source Complete Plus database, apparently made available by several publishers in the UK and USA. So we created a webpage with direct links to the books to make it easy for students and other members to access them more easily."

"These books cover both basic project management and important current topics," Pells adds. "So we think they can be very useful, especially for students and those relatively new to project management. Several were actually best-selling books."
