According to **David Pells**, managing director of the PM World Library, "Organizational change is a very common type of project in today's rapidly changing global economy. Whether changes are to implement new policies or systems, merge with or acquire another organization, enter new markets or simply restructure, organizational change projects can be complex and difficult. These new resources in the library should be useful to anyone leading or working on an organizational change project."

"I have experienced many organizational changes during my career," Pells adds. "I think most people working in business or government organizations have. What's different now is the frequency and business impact of organizational changes, and how many are being managed as projects."
