

## Research Internship for Students of Project Management

PM World, Inc. is a digital publishing and information services company based in Addison, Texas, USA. The company publishes the monthly online *PM World Journal* at [www.pmworldjournal.net](http://www.pmworldjournal.net), registered with the US Library of Congress as digital publication ISSN: 2330-4480. The journal has been published monthly since August 2012, is indexed by EBSCO and is now recognized as one of the leading online publications serving the global project management community.

Launched in February 2014, the **PM World Library** (PMWL) at [www.pmworldlibrary.net](http://www.pmworldlibrary.net) provides an archive for all works published in the *PM World Journal*. Both the journal and library are focused on the global program and project management (P/PM) field, which is rapidly growing in government, industrial and non-profit organizations worldwide. Now organized to resemble a digital version of a more traditional library, the PMWL is growing into a more robust specialist library for those involved with projects of all kinds. In June 2015, access to EBSCO's massive Business Source Corporate Plus database was added, along with access to EBSCO Business Book Summaries database; access to other resources is being added on a regular basis. (Library membership is at 3,500 and growing daily. Ave monthly website traffic: 8,000+ unique visitors; 32,000+ unique visits; 200,000+ page views.)

**PM World offers several unpaid research internships** for students of project management to conduct research and assist with populating the PMWL. Communications and work will be performed virtually. Approximately 2-3 hours per week of work is anticipated (based on student's schedule). Academic reference required (professor or university administrator). Benefits to successful candidates include: **5 years of free access to all contents in the library**; individual intern showcase webpage where profile and research results will be posted; recognition on team pages on the PMWJ and PMWL websites, and with each contribution; opportunity to learn more about program/project management and P/PM resources available worldwide, and to deep dive into specific topics; opportunities to interact with expert P/PM practitioners and world class academics; introduction to other interns around the world; **Certificate of Completion and Letter of Recommendation** on successful completion of internship. This position may or may not qualify for university credit (students are responsible for applying for university credit). Internships will be for approximately 20 weeks, during which interns will be expected to contribute 16 research results (generally weekly in a standard format), after which students can add the experience to résumé for career purposes. For more information, contact [Director@pmworldlibrary.net](mailto:Director@pmworldlibrary.net)
