Polish IT start-ups invading Silicon Valley

Polish IT start-up scene is growing at the fast pace. Polish innovative companies not only operate on local market, they also successfully enter western and US markets with their products.

The team from Krakow took first place in the competition organized on the occasion of TechCrunch Disrupt SF. Poles impressed the judges a great product and the existing achievements. As a reward, the person will spend two weeks in China, where they learn to live as the distribution of technology solutions.

Estimote (<http://www.estimote.com>) is a system of sensors connected to a mobile application that collects data about customers such as store. When you buy a set of three iBeaconów for nearly \$ 99, we can provide information and assistance in choosing the right things to our client. The one that goes near our premises can also receive information about promotions.

Audioteka, is a platform to buy professionally produced audio books. Startup was due to Martin Beme who in 2008 decided to create one of Poland's most popular e-businesses. Helped in the development of funds received. To this day Audioteka invested several million (exact figures have not been made public). Audioteka operates in Poland, Czech Republic, France, Spain, Finland, Lithuania and Hungary.

Service **Vocabla** was created in 2011, and the brainchild of Michael Dyrda. Entrepreneurs worked at the beginning of a business angel Rafał Han and other private investors. Startup developed to the extent that interest Krakow Satus Ventures investment fund. Last year, it invested 1.2 million. With vocable we can learn words using the tests. There are mobile apps for iOS, Android and Chrome plugin. Vocabla promoted in Poland, Spain, Argentina, Peru and Chile.

Tabletized.us (<http://www.tabletized.us>) is a polish startup aimed at the growing mobile and tablet market. Tabletized is a marketing platform that allows small and medium size companies to kick start mobile advertizing. The platform allows to create ready to use mobile marketing applications and execute tailor mobile strategy within days. The company is already present on the the US market helping various companies in their quest to reach mobile audience.

IVO Software

Lukasz Osowski and Michał Kaszczuk, two graduates of the University of Gdynia agree in 2001 to open IVO Software. Originators interested in artificial intelligence begin work on an application, which is to voice communication between computer and human. Its functions are to be primarily used for sound production of websites and web content writing in the form of mp3 files. Originators startup seeing potential in established technologies agree to take over the world in your product.

IVO Software company gets in your way to success many awards, but it is not resting on its laurels. According to the trends, the company's management decided after a few years of the move-to-speech functionality for smartphones. Therefore, in September 2011, created an application for Android, which allows the individual to be read content. In the same year, the original name of the company (IVO Software) is changed to IVONA Software.

IVONA is the most famous speech synthesizer in the world.

International Conference AgileByExample.

16-18 October in Warsaw, for the third time, an international conference will be held AgileByExample presenting examples of successes and failures in agile projects.

AgileByExample a unique opportunity to learn how agile is used by world-class experts on how to avoid common mistakes and improve team effectiveness.

Among this year's presenters were:

- Jeff Sutherland - one of the founders of Scrum and
- Jurgen Appelo - author of "*Management 3.0: Leading Agile Developers, Developing Agile Leaders*"

The third day of the conference is a workshop LeanAgile Dojo - a unique opportunity to gain practical skills in the use of agile methods.

The first 150 registered people will be able to attend free workshops LeanAgile Dojo Day.

Highly recommended !

PM Training Platform

If you are interested in the subject of innovative project management ? Always wanted to be a Project Manager? Or maybe your adventure with projects not yet even begun? Whatever the answer, we invite both novices and experts to participate in a series of trainings and workshops Platform Training PM Days. This year's theme is Project Management innovative use of modern technology.

Platform Training Classes are aimed at students of Warsaw University. The organizers of the training and workshops are members of the Student Research Project Management operates at the School of Economics in Warsaw.

Workshops and training will be conducted by representatives of companies operating in the industry and business environment. Participants interested in this subject and experienced project managers will have the opportunity to meet, make new contacts and expand your knowledge. In addition, the participants will be waiting for interesting activities and competitions.

Classes will be held every week from October 24 to hours 18.00 - 20.30 at the Warsaw School of Economics (<http://tiny.pl/hzvwt>).

The presence of the training will be certified.
