

Mediterranean Hot Spots Investment Programme

[New Resource in the Library](#)

European Investment Bank (EIB) finances water and environmental projects in the Mediterranean Region

27 November 2015 – Milan, Italy – A new resource has been added to the PM World Library related to projects and project management in the European Union. The new resource is titled “Mediterranean Hot Spots Investment Programme (MeHSIP)”.

Providing loans, equity, guarantees and technical assistance, the MeHSIP has three main objectives – to improve water cycle and solid waste management, to reduce health risks and to lower the industrial pollution of the Mediterranean. The programme supports projects in these fields, such as Integrated Pollution Reduction for Lake Bizerte (EUR 80m) and Wastewater Treatment Expansion for Kafr El-Sheikh Governorate (EUR 164m). MeHSIP is funded by European Commission grants and it assists project promoters in preparing investment activities during each phase of the project cycle.

The document presents the MeHSIP basic structure and the requirements for accepting projects.

To access this new resource, go to <http://pmworldlibrary.net/major-projects-programmes/>, scroll down and click on “Resources for Planning/Managing Major Projects/Programmes”, then on “Mediterranean Hot Spots Investment Programme (MeHSIP)”. Must be a registered member to access.
