Celoxis Project Management Platform

Resource provided by Nitish Mohan

10 May 2016 – Pune, India – A new resource has been added to the PM World Library related to project management software. The resource is titled **"Celoxis Project Management Platform"**. With thousands of customers worldwide, Celoxis was founded in 2001 and is based in Pune, India.

Celoxis offers an integrated and customizable project management platform with advanced features that provide enterprises and organizations with complete and timely information regarding the status of projects, financials and resources, so they can make informed decisions and adjustments proactively. It is one of the earliest to be offered as SaaS but is also available on premise. Customers across industries and continents have relied on this project management software for successfully managing small to multi-million dollar projects, and they continue to do so. Version 9.5 is the latest release that offers not only a new look and feel, but also powerful and flexible features

This integrated project management software provides an end-to-end business tool that includes features such as weekly timesheet, timer, cost and billing rates, service codes, expense tracking and online approval process. It supports multiple and flexible billing options, budget planning, cost projections and revenue forecasting. All these data is available in portfolio dashboards to help users gather insight for real-time as well as strategic management. The latest version introduces new charts with improved colors, animations and interactivity. New packaged and pre-built reports enables users at all levels to have multiple perspectives, while the advanced reporting engine allows users to create custom data visualization, drill-down reporting, multi-level grouping, dynamic filtering and use of custom fields.

To access this new resource, go to the PPM Marketplace in the PMWL at http://pmworldlibrary.net/ppm-products-and-services/, click on "Software, Tools and Technology," then scroll down to India-based solutions. Must be a registered and logged-in member to access.

For Post in PMWL

Celoxis Project Management Platform – A complete solution that provides managers and professionals the tools to plan, delegate, collaborate, track and control a project throughout the whole life cycle. It has an

intelligent scheduling engine and a fully interactive Gantt chart that factors in dependencies, constraints, calendars, vacation and other holidays. Management dashboards provide consolidated views on the progress of projects as well as real-time views of resource workloads across projects. More at http://www.celoxis.com/ (Mohan)
