**The top 10 benefits of project management**

**Access to research paper from Bright Hub Project Management added to PM World Library**

Resource provided by [Faith Onwunalu](#)

24 June, 2017– Rome, Italy – Access to a new resource has been added to the PM World Library (PMWL) related to the value of management. The new resource is titled “**The top 10 benefit of project management**”, an article posted on the Bright Hub Project Management website.

The benefits of project management serve everyone involved in the PM process: the manager who oversees the project, the client who anxiously awaits for the completed project and the production team which gets the project up and running.

Project management is not rocket science, yet it often gets dressed up that way. At its foundation lies a bedrock of basic organizational skills, which - come to think of it - might as well be rocket science the way some managers grapple with the concept. In reality, project management is just a set of tools, a roadmap if you will, that enables managers to guide a project from point A to point B and do so in a way that demonstrates efficiency, cost-savings and plain old ingenuity.

To access this resource, go to the PM Applications and Hot Topics section of the PMWL at <http://pmworldlibrary.net/applications-and-topics/>, click on the “Value of Project Management”, scroll down to article. Must be registered and logged-in as Free Trial, Professional or Scholar Member to access.
