The Impact of Organizational Culture on Performance of Construction Projects

Access to paper on the influence of organizational culture on construction project success added to the PMWL

Resource provided by [Aizhan Aliakbarova](#)

6 October 2017 – Almaty, Kazakhstan – A new resource has been added to the PM World Library related to Cultural Intelligence and Project management. The new resource is titled “The Impact of Project Organizational Culture on the Performance of Construction Projects”, a paper published in the open access journal Sustainability authored by Luong Hai Nguyen and Tsunemi Watanabe.

Following empirical studies of several investigators on the impact of culture on project management in the construction industry, a new study was conducted in order to identify whether the project organizational culture has influence on the performance of construction projects in Vietnam. The results of the analysis showed that the contractor’s commitment to contract agreements is the key cultural factor affecting project success. Other factors such as goal alignment and reliance, contractor commitment, and commitment to workers contribute to improved overall performance and participant satisfaction.

To access this new resource, go to the Applications and Hot Topics section of the PMWL at <http://pmworldlibrary.net/applications-and-topics/>, click on “Cultural Intelligence in Project Management”, scroll down and click on article title. Must be a registered and logged-in scholar, student or trial member to access.

For PMWL Post

[The Impact of Project Organizational Culture on the Performance of Construction Projects](#) – published on May 9th, 2017, an article by Luong Hai Nguyen and Tsunemi Watanabe published in the Journal Sustainability, published by MDPI (Multidisciplinary Digital Publishing Institute), an academic open access publisher based in Switzerland.
