## **Why is Good Project Management Important?**

***Access to good advice for IT project management added to PM World Library***

Resource provided by [Faith Onwunalu](#)

27 January, 2018 – Rome, Italy – Access to a new resource has been added to the PM World Library (PMWL) related to the management of ICT projects. The new resource is titled “*Why is Project Management Important?*” This article is a post by Ben Aston on DPM (Digital Project Management).

‘Why is project management important?’ is an interesting question that clients sometimes pose. They’ll ask: “Can’t we just brief the team doing the work and manage them ourselves? It’ll be loads cheaper.” They wonder if they really need project management because on paper it looks like an unnecessary tax and overhead as project managers don’t really deliver anything and often get in the way of what they want the team to do! So if all that’s true, why is project management important? Article answers these questions and discusses benefits of project management.

To access this new resource, go to the Industries and Organizations section of the PMWL at <http://pmworldlibrary.net/industries-and-organizations/>, scroll down and click on “Information and Communication Technologies”, scroll down to article. Must be registered and logged-in as Free Trial, Professional or Scholar Member to access.
