Project management in medical publication writing

Access to new resource related to project management in medical publication writing added to PM World Library

Resource provided by [Ovyia RK](#)

13 February 2018 – Mumbai, India – Access to a new resource has been added to the PM World Library on the subject of Industries and organizations. The new resource is titled “**Project management in medical publication writing**”.

Very often we look at project management as a need for managing projects in any industry. When it comes to pharmaceutical industry, project management can be applied to different domains. Drug development forms the core of the pharmaceutical industry. Medical writing is the key function in pharmaceutical companies and clinical research organizations that works on scientific publications and regulatory dossiers. Medical publication writing on the other hand deals with scientific publications such as manuscripts, abstracts, presentations, and posters. Project management is essential for the expedited execution and seamless delivery of publication writing projects with a quick turnaround time.

Prashant Auti, Rishabh Pandey and Vatsal Shah through their article have given a deeper insight into end-to-end project management of publication writing (PW) projects which is in line with the five process groups recognized in the Project Management Body of Knowledge (PMBOK) published by the Project Management Institute (PMI).

To access these resources, go to the Industries and Organizations section of the PMWL at <https://pmworldlibrary.net/industries-and-organizations/>, click on “Healthcare, Hospitals and Medical Services”, then click on “papers”.

For PMWL Post

[Project management in medical publication writing](#) – A March 2016 paper in *Medical Writing* by Prashant Auti, Rishabh Pandey, Vatsal Shah, published by the European Medical Writers Association. Medical writing is the key function in pharmaceutical companies and clinical research organizations that work on scientific publications and regulatory dossiers. Medical publication writing deals with scientific publications such as manuscripts, abstracts, presentations, and posters. The authors provide insight into end-to-end project management of publication writing (PW) projects which is in line with the five process groups recognized in the Project Management Body of Knowledge (PMBOK) published by the Project Management Institute (PMI).
