Involving Stakeholders in Railway Projects

Access to information related to stakeholder management in rail transport industries added to PM World Library

Resource provided by [Rajamahender Rapelly](#)

12 February 2018 – Mumbai, India – Access to a new resource has been added to the PM World Library on the subject of project management in rail transport industries. The new resource is titled “**Involving Stakeholders in your Railway Project**”, published on the website of Citizen Rail.

Stakeholder management is the critical component in the successful delivery of any project. A stakeholder is any individual, group or organization that can affect, be affected by, or perceive itself to be affected by a project. In this resource, it talks about the framework in which stakeholders participate in the context of railway projects. It also includes the different methods of stakeholder analysis, participation, and evaluation.

The article is based on results of a survey in the Citizen’s Rail Project. It says that stakeholders should be involved in your railway project because the needs of the stakeholders should be considered. It also talks about the identification of the stakeholders, how and when stakeholders can be involved in your railway project, the stakeholder participation cycle, and the stakeholder engagement cycle.

To access these resources, go to the Industries and Organizations section of the PMWL at <https://pmworldlibrary.net/industries-and-organizations/>, scroll down and click on “Rail Transport Industries”, then scroll down to resource. Must be registered as Free Trial, Professional or Scholar member and logged in to access.

For PMWL Post

[Involving Stakeholders in your Railway Project](#) - Stakeholders management is a critical component in the successful delivery of any project. This 2010 article on Citizen’s Rail Project website talks about the framework in which stakeholders participate in railway projects and includes the different methods of stakeholder analysis, engagement and evaluation.
