

Managing Stakeholders in Megaprojects

Access to new resource related to Major Projects & Programs added to PMWL

Resource provided by [Ömer Berkay Dağlı](#)

18 January 2018 – Southampton, UK – Access to a new resource has been added to the PM World Library on the subject of Major Projects & Programs. The new resource is titled “**Managing Stakeholders in Megaprojects: The MS Working Group Report**” and edited by Paul Littau within COST (European Cooperation in Science and Technology) which is an intergovernmental framework aimed at facilitating the collaboration and networking of scientists and researchers at the European level.

The resource tries to answer 2 guiding questions:

1. What are the problems that occur with stakeholders in megaprojects?
2. How to manage those problems and stakeholders?

Report’s aim is “...to understand how megaprojects can be designed and delivered more effectively to ensure their effective commissioning within Europe. Effective design and delivery means not only insuring that the megaproject is delivered on-time and to budget but that it satisfies the societal and commercial needs that motivated its creation and that it continues to do so throughout its entire life-cycle” as they defined.

To access this resource, go to <https://pmworldlibrary.net/major-projects-programmes/> , click on “General Resources for Managing Major Projects/Programs”, Then scroll down to find resource. Must be registered and logged in as Free Trial, Professional or Scholar member to access.
