

Customised Project Management Methods in Shipbuilding

Resource related to project management in Marine, Shipping and Sea Transport Industries added to PMWL

Resource provided by [Ömer Berkay Dağlı](#)

3 February 2018 – Southampton, UK – Access to a new resource has been added to the PM World Library on the subject of project management in Marine, Shipping and Sea Transport Industries. The new resource is titled “**Customised Project Management Methods and Their Applications in Shipbuilding Projects**” and is a 2017 research prepared by Dogan and Helvacioğlu, published in Journal of I.T.U. Faculty of Naval Architecture and Ocean Engineering.

The research focused on the investigation of using project management methodologies in shipbuilding projects. With inputs from a literature review and discussion on shipbuilding projects in Turkish shipyards, article examined the current usage of project management methods in shipbuilding projects.

To access this report, go to the hot topics section of the library at <https://pmworldlibrary.net/industries-and-organizations/>, scroll down and click on “Marine, Shipping, Sea Transport Industries”. Must be registered and logged in as Free Trial, Professional or Scholar member to access.

For PMWL Post
