Business Is Embracing the Internet of Things

Access to “Business Is Embracing Internet of Things as most Important Technology, says new study” added to PM World Library

Resource provided by [Vishwanath Guduguntla](#)

17 February 2018 – Rome, Italy – Access to a new resource has been added to the PM World Library on the subject of the Project Management Profession. The new resource is titled “***Business Is Embracing Internet of Things***”, a January article in Forbes magazine, USA.

The Internet of Things (IoT) is heralded as a foundational technology for breakthroughs in artificial intelligence, robotics and other potentially broadly applicable advances. But for frontline decision makers—the executives charged with implementing the IoT in their company—it can sometimes feel impossible to separate the facts from the hype. It can be even more daunting to discern the practical steps required to get started with IoT in their business.

To better understand the current state of the IoT, Forbes Insights partnered with Hitachi Vantara to survey more than 500 senior executives around the world who are leading IoT initiatives within their companies. Sponsored by Hitachi Vantara, highlights the key findings from this research, and addresses important issues.
