

Framing Security as a Governance and Management Concern

Access to research work on Management by Julia H. Allen added to PMWL

Resource provided by [Livinus Nweke](#)

18 February 2018 – Rome, Italy – Access to a new resource has been added to the PM World Library related to the Security of Project Data, Information and Systems. The new resource is titled **Framing Security as a Governance and Management Concern: Risks and Opportunities**. This research work by Julia H. Allen was published on United States Computer Emergency Readiness Team (US-CERT) website in 2006.

The article briefly describes six "assets" or requirements of being in business that can be compromised by insufficient security investment. Conversely, adequate security investment can reduce risk and create business opportunity. The article closes by describing barriers that must be overcome when forming security governance and management programs.

To access this great resource, go to the Applications and Hot Topics section of the library at <http://pmworldlibrary.net/applications-and-topics/>, scroll down and click on "Security of Project Data, Information and Systems". Must be a registered member and logged-in to access.
