American Public Transportation Association

Access to new information about project management in rail transport industries added to PM World Library

Resource provided by [Rajamahender Rapelly](#)

04 March 2018 – Mumbai, India – Access to a new resource has been added to the PM World Library related to projects and project management in rail transport industries. The new resource is titled “**American Public Transportation Association (APTA)**”.

The American Public Transportation Association was founded in the year 1882. It is a non-profit organization that educates its members and the public about various aspects and benefits of public transportation through bus, paratransit, light rail, commuter rail, subways, waterborne services, high-speed rail, and intercity and passenger rail programs.

APTA members are public organizations that are engaged in the bus, paratransit, light rail, commuter rail, subways, waterborne passenger services, and high-speed rail. Members also include large and small companies who plan, design, construct, finance, supply, and operate bus and rail services worldwide. Government agencies, metropolitan planning organizations, state departments of transportation, academic institutions, and trade publications are also part of their membership.

It also has a resource library which has a comprehensive collection of reports, studies, and publications for and about public transportation - from statistics to committee-guidance documents and much more.

To access these resources, go to the Industries and Organizations section of the PMWL at <https://pmworldlibrary.net/industries-and-organizations/>, scroll down and click on “Rail Transport Industries”, then scroll down to resource. Must be registered as Free Trial, Professional or Scholar member and logged in to access.

This resource provided through the PMWL’s research internship program, which you can [learn more about here](#).
