

Making Vulnerable Investment Projects Climate Resilient

New resource related to dealing with climate change added to PMWL

Resource provided by [Ömer Berkay Dağlı](#)

9 March 2018 – Southampton, UK – Access to a new resource has been added to the PM World Library on the subject of solving global problems. The new resource is titled “**Guidelines for Project Managers: Making Vulnerable Investments Climate Resilient**” and is a 2009 guideline prepared by European Commission.

This EC report was aimed at helping project managers understand the steps they can take to make investment projects more resilient to climate variability and change. Guidelines were intended to minimise climate change-related loss to public, private and combined public/private investments, leading to more robust investment projects and, ultimately, more resilient economies. They were prepared to help managers to improve the success of investment projects and ensure their long-term sustainability. On the other hand, by using these Guidelines, project managers can also demonstrate to project sponsors that climate resilience has been considered.

To access this report, go to the Solving Global Problems section of the library at <https://pmworldlibrary.net/solving-global-problems/> scroll down and click on “Dealing with Climate Change”. Must be registered and logged in as Free Trial, Professional or Scholar member to access.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)
