What Project Managers need to know about Cyber Security

Access to good cyber security advice for project managers added to PM World Library

Resource provided by [Faith Onwunalu](#)

1 April 2018– Rome, Italy – Access to a new resource has been added to the PM World Library (PMWL) related to the management of ICT projects. The new resource is titled “***What Project Managers Need to Know About Cyber Security***”. This article is a 2017 post on the Clarizen Blog.

Because companies are often segmented into departments based on discipline, it’s easy to assume that the IT department bears sole responsibility for cyber safety on a company-wide scale. Unfortunately, IT specialists aren’t the only ones logging into systems and utilizing networks. Every employee bears some responsibility for cyber security in this day and age. Even if you’re not specifically involved in IT project management, your behavior or lack of knowledge could increase the risk for hacking if you’re not aware and informed. This is especially important since an estimated 40% of recorded crimes are now attributed to cyber-crime

To access this new resource, go to the Applications and Hot Topics section of the PMWL at <https://pmworldlibrary.net/applications-and-topics/>, scroll down and click on “Security of Project Data and Information”, scroll down to articles. Must be registered and logged-in as Free Trial, Professional or Scholar Member to access.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)

For PMWL Post

Clarizen (2017); [What Project Managers Need to Know About Cyber Security](https://www.clarizen.com/project-managers-need-know-cyber-security/), a July 12, 2017 educational post on the Clarizen corporate blog about cyber security issues for project managers. <https://www.clarizen.com/project-managers-need-know-cyber-security/> ([Onwunalu](#))
