Transforming Risk Management into Uncertainty Management

Access to new resource related to risk management added to PMWL

[Resource provided by İsmail Can Kürtük](#)

26 April 2018 – Southampton, UK – Access to a new resource has been added to the PM World Library (PMWL) related to project risk management. The new resource is titled ‘**Transforming Risk Management into Uncertainty Management**’, a paper by Chris Chapman and Stephen Ward and published in February 2003 by International Journal of Project Management.

The authors argue that most project risk management models ignore uncertainty. By contrast, the authors look at uncertainty as including both threats and opportunities for project managers. In this paper the authors evaluated how to convert project risk management to uncertainty management and to do risk management more efficiently.

To access this new resource, go to the P/PM Applications - Hot Topics section of the library at <https://pmworldlibrary.net/applications-and-topics/>, click on “Risk Management”, scroll down to papers. Must be a registered trial, professional or scholar member and logged-in to access.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)
