6 Effects of the Internet of Things on Project Management

Access to new resource related to the impact of Internet of things on project management added to PMWL

 Resource provided by Abhinav S Kumar

16 September 2018 – Mumbai, India – Access to a new resource has been added to the PM World Library (PMWL) related to the Internet of Things and project management. The new resource is titled "6 Effects of the Internet of Things on Project Management", a blog article in June 2018 by Nikhil Daddikar posted on Captera.com.

The resource's main focus is on how we structure and manage projects after the entry of Internet of things. The author then goes on to list and explain the various changes/effects that can be expected in IoT project management methodologies

To access this new resource, go to the Applications and Hot Topics section of the library at https://pmworldlibrary.net/applications-and-topics/, scroll down and click on "Internet of Things", scroll down to resource. Must be registered and logged-in to access.

This new resource provided through the PMWL university research internship program; to learn more, click here
