### Project Delivery in Nigeria: Using Earned Value Management to improve Project Performance

- This research *explores*
  - How the elements of Earned Value Management are impacted by the
    - Practitioner's value system *and* the resulting consequences on project performance in Nigeria.
  
- Main Research Question:**
  - Is there a relationship between the elements of earned value management and project performance in Nigeria which is influenced by the practitioner's value system?
  
- Sub Questions:**
  - How does EVM look like in use by industry, by sector and by type of project in Nigeria?
  - How do the practitioners rate on EVM usage?
  - Does EVM usage relate to practitioner's achievement levels on project performance controlling for the effects of prior achievement and value system of the practitioner?
  
- Research Aim**
  - Improve understanding of how the elements of Earned Value Management (EVM) are impacted by the practitioner's value system and the resulting consequences on project performance in Nigeria.
  
- Research Objectives :**
  - Understand the relationship between elements of earned value management and the dimensions of project performance in Nigeria
  - Determine how value systems of practitioners influence the relationship between the elements of EVM and analyze the observed characteristics in the project performance in Nigeria.
  - Contribute to the scholarly debate exploring untapped evidence from within Nigeria.
