

Tutorial on Earned Value Management Systems

Access to new resource related to EVM added to PMWL

Resource provided by [Lucky Edjenekpo](#)

16 March 2019 – Warri, Nigeria – Access to a new resource has been added to the PM World Library (PMWL) related to Earned Value Management. The new resource is titled “*Tutorial on Earned Value Management Systems*”, by Frailey, D. J. (1999), originally published in *Software Project Management* and now available from Google Scholar online.

“In the midst of a typical project, it is often desirable to estimate such quantities as how much time is left? or how much of the work is complete? or how much money will the project spend before it is complete?” ----- “Earned Value Analysis (EVA) is a way to measure the amount of work actually performed on a project (i.e., to measure its progress) and to forecast a project’s cost and date of completion. The method relies on a key measure known as the earned value (also known as the budgeted cost of worked performed or BCWP).” (Frailey, 1999, p. 1)

To access this new resource, go to the Applications and Hot Topics section of the library at <https://pmworldlibrary.net/applications-and-topics/>, click on “Earned Value Management”, scroll down to resource. Must be a registered member and logged-in to access.

This new resource provided through the PMWL research scholars program; [to learn more, click here](#)

For PMWL Post

Frailey, D.J., (1999). **Tutorial on Earned Value Management Systems**. *Software Project Management* pp. 1-14. Google Scholar. Available online at <http://processgroup.com/earned-value4.pdf> ([Edjenekpo](#))

Where to post in the library: <https://pmworldlibrary.net/applications-and-topics/earned-value-management/>
