

Scrum Sundae

Access to new resource related to Agile Project Management added to PMWL

[Resource provided by Tony Itodo](#)

30 April 2019 – Akure, Ondo State, Nigeria – Access to a new resource has been added to the PM World Library (PMWL) related to Agile Project Management. The new resource is titled “Scrum Sundae” and is an article by Lev Barbalat published online in PM Times in January 2019.

This article gives cases when the standard scrum is not enough and variation to the procedures should take place. These cases are as listed below:

- Scrum is not applicable to the initial phase of the project such as discovery
- Scrum is hardly applicable when new technology is expected to be introduced

The author concluded that Scrum is not a solution for all processes and doesn't cover all activities that exist during the development of projects such as planning, design of the project or introduction of new technologies. Variations of Scrum could be applied, however, to get the desired output.

To access this new resource, go to the Applications and Hot Topics section of the library at <https://pmworldlibrary.net/applications-and-topics/>, click on “Agile Project Management”, scroll down to resource. Must be a registered member and logged-in to access.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)

For PMWL Post

Barbalat, L. (2019), Scrum Sundae; Project Times, January 15. This article gives cases when the standard scrum is not enough and variation to the procedures should take place. Available online at <https://www.projecttimes.com/articles/scrum-sundae.html> (Itodo)
