

Mining Industry benefits from Project Management

Access to new resource related to project management in the mining industry added to PMWL

Resource provided by [Tirumala Parchuri](#)

8 January 2020 – Mumbai, India – Access to a new resource has been added to the PM World Library (PMWL) related to project management in the mining industry. The resource is an article in Creamer Media’s Engineering News in South Africa by Bruce Montiea in July 2014 titled “Mining Industry benefits from Project Management.”

Project management is useful to the mining industry, as it organises a team of specialists, such as geologists, environmental specialists, mining engineers and processing specialists, who need to collaborate to successfully complete projects, says process engineering design services provider Swartz Technical Consulting (STC) founder Bronwyn Swartz.

Swartz says government and the private sector should focus resources on promoting careers in the built environment, such as project management, to learners. “The skilled project management professionals who have emigrated should also be encouraged to return and use their project management experience to help in growing South Africa’s economy.”

To access this new resource, go to the Industries and Organizations section of the library at <https://pmworldlibrary.net/industries-and-organizations/>, scroll down and click on Mining – Natural Resources. Must be a registered trial, student or full member and logged-in to access.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)

For PMWL Post
