

Micromanagement: A PM Tool during Crisis

Access to new resource related to project management during a project crisis added to PMWL

Resource provided by [Milan Choudhury](#)

9 November 2020 – Nagpur, India – Access to a new resource has been added to the PM World Library (PMWL) related to project crisis management. The new resource is titled “**Micromanagement: A Project Management Tool in Crisis**”, a paper by Amandip Singh Sidhu published in the International Journal of Economics and Management Sciences in 2012.

The resource advocates micromanagement as a tool of last resort in the project manager’s arsenal. It begins by describing micromanagement as a practice within the context of project management. It then talks about identifying the project manager’s need to micromanage including factors such as slipping deliverables, stakeholder angst, apathetic team attitude, etc. Finally, a case study is discussed that elucidates these principles.

To access this new resource, go to the Applications and Hot Topics section of the library at <https://pmworldlibrary.net/applications-and-topics/> click on “Crisis Project Management”, scroll down to resource. Must be a registered trial, student or full member and logged-in to access. If you are not a registered member, try the Free Trial Membership for 30 days.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)
