

Applications of AI in Project Management

Access to new resource related to AI and Project Management added to PMWL

Resource provided by [Balzhan Khamitova](#)

22 February 2022 – Almaty, Kazakhstan – Access to a new resource has been added to the PM World Library (PMWL) related to Artificial Intelligence (AI) and Project Management. The new resource is titled “**Applications of AI in Project Management**” by Dipayan Deshmukh & Namratha Mohan.

With the rapid development of computer technology and neural connections, artificial intelligence (AI) is applied in every field from business to medicine. The main highlights of AI are its ability to process big data in a matter of time, self-learning with the simple help of people, and the ability to predict.

In this blog, the authors present various ways in which AI can help in the Project Planning phase. Additionally, there are presented applications that can help project managers in their work. The most popular AI applications are Knowledge-based expert system (KBE system), Artificial neural network (ANN), Fuzzy logic (FL), etc. The article gives the general description of application and describe step by step its process.

To access this new resource, go to the Applications and Hot Topics section of the library at <https://pmworldlibrary.net/applications-and-topics/> scroll down to “Hot Topics in P/PM”, and click on “Artificial Intelligence (AI) and Project Management”, scroll down to resource. Must be a registered member and logged-in to access. If not registered, please consider the FREE Trial Membership.

This new resource provided through the PMWL university research internship program; [to learn more, click here](#)

For PMWL Post
