Agile with Ukraine

Agilists worldwide called to support Ukraine in the country's existential fight for survival and Western Democracy

20 March 2022 – Canada, Poland, Ukraine, USA – An international group of agile practitioners are creating a global network and organizing a series of online meet ups in support of Ukraine, the independent European country invaded by Russia in early February. They are inviting agilists, agile practitioners and professionals worldwide to support Ukraine through involvement and donations.

According to their new website: “When the story is written on this shameful chapter in the history of our race, future generations will ask each and every one of us – ‘When innocent families were being killed, where were you? When hospitals and homes were being bombed, what did you do?’

This is not the time to be a bystander. The Agile industry is mobilizing to send a clear message. There is no room in our industry for those who enable, condone, support or engage in the killing of innocent people. We are expressing our support and love for Ukrainian families by doing what we do best - teaching and learning how to guide this complex adaptive system that is our world. If you want to face the mirror of history with pride and dignity, join us as we gather in a series of conversations to be Agile With Ukraine. Speak, listen, spread the word and help us raise funds to protect the innocent families of Ukraine.”

Organized in cooperation with UNITERs foundation (United Volunteers) - formerly Initiative of the Heroes of Maidan based in Warsaw – a nonprofit organization working since 2014 for children and families of Ukrainian soldiers and volunteers who have died, been injured, or are still fighting to defend their homeland. They work with hundreds of volunteers around the world, as well as with the state organizations in Poland and Ukraine and have completed dozens of projects. Learn more at <https://zrzutka.pl/>
