Wideman PM Website updates announced for August 2022

1 August 2022 – Ontario, Canada – **Max Wideman** has announced updates to his popular project management website, www.maxwideman.com.

According to Max (pictured), after extensive repairs and clean up, my website is now back online with all of its 414,000 links. Only one source this month, but it is quite large. It provides an excellent description of the practice of the Management of Project Risks knowledge Area.

Guest: Authors *Nerija Banaitiene* and *Audrius Banaitis* from the **Faculty of Civil Engineering**, Vilnius Gediminas Technical University, Vilnius, Lithuania, present their findings and recommendations as a result of their research into [Risk Management in Construction Projects](#) in their country.

Their deep-dive into this project management field, although in Lithuania, nevertheless exposes findings that are typical, and of considerable value, to construction projects in any part of the world. Hence, their paper is a valuable addition to the project management knowledge area of project risk management particularly in the construction field.
