

Earned Schedule 20th Anniversary Special FREE Event

22 January 2023 – Melbourne, Australia – The publication of ‘Schedule is Different’ in the March 2003 edition of the College of Performance Management’s *Measurable News* introduced Earned Schedule (ES) to the world. ES provides project controls professionals with a method for accurately predicting the likely completion date of a project, overcoming limitations in both CPM and EVM.

To celebrate the 20th Anniversary of this event PGCS is running a FREE global webinar on the 8th of March 2023.

This Special Event features eight international speakers including the ES creator Walt Lipke, and Keith Heitzman the controls manager for NASA’s Artemis Project, plus speakers from Europe, the Americas, and Australia. Full details of the speakers, their bios and abstracts are available on the event page at:

<https://www.pgcs.org.au/library1/2023-es-special-event/>

The webinar will be broadcast twice, starting at 1:00pm on the 8th March Sydney time, and then 11:00am New York time, and run for approximately 4 hours, the presentations will be made available to delegates for review shortly after the webinar concludes.

You are invited to register for this Special Event at:

<https://www.pgcsymposium.org.au/webinar-series.html>

Log-in details will be forwarded prior to the webinar starting.

Editor's note: The PM World Journal has published a number of papers by Walt Lipke, creator of the Earned Schedule approach. Visit Walt's author showcase in the PMWJ at
