## Wideman PM Website updates announced for February 2023

3 February 2022 – Vancouver Island, Canada – **Max Wideman** has announced updates to his popular project management website, [www.maxwideman.com](http://www.maxwideman.com). According to Max (pictured), here are my latest site entry details.

**Introduction:** As regular readers will know, this site has been inactive over the last three months. For this we apologize most sincerely. The reality is that we have been relocating from Toronto in Ontario to Victoria in British Columbia. The details of that move are described in our latest paper. The move itself went well, but the "resettling" in Victoria took much longer than expected. That was partly due to finding one's way around in a strange place, and partly due to making all the necessary connections to get established in a strange place. Then there was Christmas . . .

**Paper:** [The Wideman's on the move again](#), as referred to above, is described in much greater detail, not only by way of interest, but because some of the details may well be of interest to those contemplating a similar move.

### Project management tip of the month

**The limitation of knowledge principle:  
You don't have to know how a car works  
To be able to drive it  
(But it does help!)**

~~~~~  
If you are looking for answers, guidelines or templates, check out Max's **Issacons** - "Issues and Considerations" - that are presented in bullet form for quick and easy reference by project managers.

Have you seen Max's book **A Management Framework for Project, Program and Portfolio Integration**? For information or to order a copy, visit [http://www.maxwideman.com/papers/framework\\_book/intro.htm](http://www.maxwideman.com/papers/framework_book/intro.htm).

**Max Wideman** is one of the world's best-known project management authorities. An engineer and professional project manager, his experience includes systems, social and environmental projects, as well as design and engineering projects. He is a Fellow of the Project Management Institute, of which he is past president and chairman and for which he led the development of the 1987 version of the Project Management Body of Knowledge. He is also a Fellow of the Institution of Civil Engineers (UK), the Engineering Institute of Canada, and the Canadian Society of Civil Engineering. His

personal web site at <http://www.maxwideman.com> is a source of superior project management knowledge and information. It is free to the public.
