Dear David

A propos of my May 2023 article: **BACK TO THE BARANGAY** – I'm delighted to report that my project proposal -- as outlined in the **Problem Analysis Diagrams (PAD)** below -- was accepted *in toto*; the initial **LIGHTING** component was funded and just completed, with solar lighting, and backup cable connection!

¹ How to cite this work: Smith, K. F. (2023). Follow Up Report on Project 'Ilaw' (Light), Letter to the Editor, *PM World Journal*, Vol. XII, Issue XII, December

A **Thanksgiving service** will be held this weekend; then it will be my responsibility to continue fund raising for the other project components. [NOTE: The 'Project' is comprised of several disparate, stand-alone components so some institutions would call it a *Program*, with separate **Projects**.]

Since this is an on-going Church-initiated project -- rather than government funding -- subsequent steps to implement the full scope for this impoverished community depend entirely upon voluntary donations.

**Donations in any amount would be appreciated, payable to
the Episcopal Church of the Holy Trinity, Makati, Philippines**
