Harness the Power of AI for PMP® Exam Prep with Project Management Institute's New PMI Infinity - PMP Exam Simulator Now Available in the GPT Store

Philadelphia, PA – January 12, 2024 – As one of the first project management-related apps in the GPT Store and free to ChatGPT Plus subscribers, the newest PMP exam prep tool helps candidates go deeper and train with the best.

Studying for the Project Management Professional (PMP)® certification exam is now more dynamic and engaging thanks to the highly anticipated GPT Store. Project Management Institute (PMI), the world's leading organization for the project management profession, staked its claim as one of the first project management-related apps in the GPT Store with its newest PMP exam prep offering, the PMI Infinity - PMP Exam Simulator.

Given the escalated demand—the global economy needs 25 million new project professionals by 2030—the project management profession presents a significant opportunity for career advancement and growth. The globally recognized PMP certification shows that an individual can lead projects in any industry. And it could also come with a monetary advantage. PMP certification holders reported higher median salaries than project professionals without a PMP certification – 33% higher on average across the 21 countries surveyed. For project professionals aiming to join the ranks of the more than 1.4 million PMP certification holders around the world, the PMI Infinity - PMP Exam Simulator is the newest way to prepare for exam day, backed by the power of AI.

The PMI Infinity - PMP Exam Simulator, now available for free to ChatGPT Plus subscribers, reinforces the candidate's mastery with real-time feedback. The mock exam consists of 175 questions that PMP candidates can take one at a time, answering at their own speed. What sets this app apart is twofold. Unlike other generative AI training platforms, the PMI Infinity - PMP Exam Simulator is trained on industry-leading project management content developed by PMI, which is continuously vetted and optimized by subject matter experts for unrivaled quality assurance. And its interactivity allows PMP candidates to go deeper into the why. Not only does it give instant rationale for the right answer, but users can have a conversation with the simulator to learn more why a certain answer is incorrect – or correct.

“Project professionals must be at the forefront of AI transformation, driving project success,” said Pierre Le Manh, PMP, President & Chief Executive Officer at PMI. “It is a unique opportunity for the profession to elevate its impact on our world. To help them seize this opportunity, we are committed to equipping our global community of project professionals with the resources, knowledge, and tools they need to adopt and leverage AI-powered technology. Launching our first GPT, a part of our Generative AI-based PMI Infinity platform, is the latest milestone in our broader PMIXAI initiative. Much more is coming this year.”

The PMI Infinity - PMP Exam Simulator uses new technology for the exam prep experience, but it's not the only exam prep resource from PMI.

PMI Study Hall™ provides a learning plan, the study content, and a way to gamify the process – all to help take the stress out of PMP exam prep. As users progress through the lessons, flash cards, games, and activities, they accomplish knowledge goals and rack up statistics on their percentile ranking and average score, all so they can better understand their unique strengths and weaknesses.

PMI® Authorized Online PMP® Practice Exam helps candidates know what to expect on exam day. It helps them become familiar with question format, working, and sample content with unlimited access to 250 practice questions.
